If you're in search of a seasoned Senior Web and Mobile Application Developer to oversee your business system across web and mobile platforms and enhance the reliability, planning, development, and maintenance of your company's system requirements, look no further.

My expertise lies in establishing your business system online, leveraging various technologies, and harnessing the power of LAMP (Linux Apache Mysql PHP) and Mobile technologies like android and IOS. This technical proficiency is instrumental in delivering invaluable solutions. Whether you require an internet system or a mobile app to boost your company's productivity, or if you have clients seeking my expertise, I am at your service.

I am adept at handling not only software but also hardware aspects. Anything related to web technologies is second nature to me. Working with minimal supervision, I possess the capability to manage individuals working on the project. My work is characterized by speed, precision, and a commitment to excellence.

## Work Experience

---

### EDR Accounting & Business Solutions Inc.

Senior Web and Mobile Applications Strategist

JUNE 2021 - PRESENT, Quezon City

I oversee the "Set up my business" (SUMB) project and its extension, SUMB-Bizmate. The inception and development of these projects, executed from the ground up utilizing Laravel and Code Igniter, fall under my purview. My managerial role involves the supervision of three senior web developers, guiding and coordinating their contributions to the projects.

Directly reporting to the CEO and co-CEO of the company, my responsibilities extend beyond the SUMB projects. I am actively involved in the oversight of two additional branches within the company: EDR Accounting and "Set up my offshore" (SUMO). In addition to managing these branches, I provide technical support to address the specific technical needs of all three branches, contributing to the overall efficiency and functionality of the company's operations.

### AireSpring Inc.

Senior Web and Mobile Applications Developer

MAY 2019 - JUNE 2021, Makati City

I am responsible for overseeing all aspects of web and application development within the company. I report directly to both the Vice President and the Vice President of Marketing. My duties encompass the management of our web, application, and cloud servers. This includes server and systems administration, application planning and development, as well as the publication of marketing documents online and the maintenance of our marketing system.

Noteworthy projects under my purview include the development and maintenance of our primary website, [www.airespring.com](http://www.airespring.com). Additionally, I oversee the creation and management of various satellite websites catering to clients based in the United States and around the world.

### Eclaro Business Solutions Inc.

Senior PHP Developer

JUNE 2015 - MAY 2019, Quezon City

I was employed at Eclaro, a Business Process Outsourcing (BPO) company, where I am responsible for managing the client account of American Towns. Specifically, my primary project involves overseeing the development, planning, and testing of their portal site, [www.americantowns.com](http://www.americantowns.com). Additionally, I am involved in the management of several satellite sites, such as [www.aarp.org](http://www.aarp.org), which serves as a portal for retirement and senior citizens in America.

Given the portal nature of the site, we are tasked with handling high-traffic servers, aiming to efficiently manage substantial data transfers within tight timeframes. This involves working with third-party APIs, including but not limited to Google Maps API, Google API, Amazon S3, Mailchimp, and others. Our responsibilities extend to feature enhancements, bug identification and resolution, user feedback assessment, administrative tasks, report generation, and data validation.

I collaborate closely with my team, consisting of two senior developers, our Chief Technical Officer (CTO), and our manager based in the United States. In addition to the American Towns project, I am concurrently involved in related initiatives such as Superpages, P300, Greentown, and others.

### **Freelance PHP Web Developer**

Various Companies Around The World

JUNE 2000 - PRESENT

I am concurrently engaged as a part-time web developer, allocating approximately 2-6 hours per day to serve various companies situated in Australia, Singapore, Hong Kong, the UK, and the US. The spectrum of projects I undertake encompasses tasks ranging from website setup to comprehensive web planning, design, and development. Notably, certain projects involve intricate third-party integrations, such as WordPress Customization Projects (including Custom Plugin development, Theme customization, and integration of libraries), Magento Customization (involving both Plugins and Themes), and compatibility with diverse e-commerce platforms like OpenCart, Prestashop, and Zen Cart.

My involvement in these projects extends to both hourly and per-project arrangements, given the unique nature of each assignment. Additionally, I am frequently tasked with managing updates to existing projects as part of my responsibilities.

### **Accela Communications Philippines Inc.**

Senior PHP Software Engineer

JUNE 2007 - JANUARY 2015, Makati City

### **Osbourne Technologies Inc.**

Web Applications Development Manager

JULY 2004 - JUNE 2007, Makati City

### **Whitecube Web Services Inc.**

Web Applications Manager Consultant

APRIL 2002 - FEBRUARY 2007, Makati City

**Cylynx Technologies Inc.**

Senior Web Applications Programmer

JANUARY 2001 - APRIL 2002, Ortigas Pasig City

**Library Associates Inc.**

Senior Web Developer

JUNE 1999 - JANUARY 2001, Quezon City

---

**Education**

---

**De La Salle University College of Saint Benilde**

Bachelor of Arts In Business Administration

Major in Computer Applications

1993 - 1997, Manila

**Cainta Catholic College (Former Cainta Catholic School)**

Pre School, Grade School & High School

1982 - 19992, Cainta Rizal

---

**Career Goals**

---

My objective is to secure a managerial position in the field of web development, such as a Project Manager or I.T. Manager, offering long-term financial stability. I aim to contribute my expertise in an environment where I can make a substantial impact on the company. Ideally, I am seeking an entrepreneurial atmosphere that embraces innovation and welcomes the incorporation of new ideas and technologies.

On a personal note, all my professional aspirations are driven by a commitment to provide for and support my family, particularly my children.
